INDEX TO VOLUME 52

Abian, Alexander. *Order in a special class of rings and a structure theorem*, 45.
Abrahamse, M. B. *Analytic Toeplitz operators with automorphic symbol*, 297.
An, Chungming. *On values of exponential sums*, 131.
Artin, M. *Wildly ramified Z/2 actions in dimension two*, 60.
Auslander, Maurice and Reiten, Idun. *On a generalized version of the Nakayama conjecture*, 69.
Beachy, John A. *On maximal torsion radicals. III*, 113.
Berge, J. O. and Brin, Matthew G. *A handlebody with one pillbox has no fake 3-cells*, 390.
Bernhart, Frank R. *A three and five color theorem*, 493.
Blakemore, C. F. and Stanojevic, C. V. *On functional equations related to Mielnik's probability spaces*, 315.
Blass, Andreas. *Equivalence of two strong forms of determinacy*, 373.
Brin, Matthew G. See Berge, J. O.
Brooks, Robin B. S., Brown, Robert F., Pak, Jingyal and Taylor, Douglas H. *Nielsen numbers of maps of tori*, 398.
Brown, Robert F. See Brooks, Robin B. S.
Brown, Ronald. *Some nonprojective subgroups of free topological groups*, 433.
Brylawski, Tom. *A note on Tutte's unimodular representation theorem*, 499.
Butts, H. S. See Quartararo, Philip, Jr.
Chen, Su-shing. *Linearization of homeomorphism groups*, 447.
Chow, H. L. *Quasi-nilpotent sets in semigroups*, 393.
Coleman, D. B. and Cunningham, Joel. *Nondegenerate higher degree forms over Dedekind domains*, 65.
Cunningham, Joel. See Coleman, D. B.
Deo, Satya. *On the tautness property of Alexander-Spanier cohomology*, 441.
———. *A one dimensional manifold is of cohomological dimension 2*, 445.
van Douwen, Eric K. *Nonstratifiable regular quotients of separable stratifiable spaces*, 457.
Ehrlich, Paul E. *A curvature obstruction to covering deformations of connections by metric deformations*, 337.
Fossum, T. V. *Unimaximal orders*, 99.
Freiria, A. A. See Izé, A. F.
Gazik, R. J. *On Biesterfeldt's Completion Axiom spaces*, 401.
Ghatage, P. *Generalized algebraic operators*, 232.
Gibson, P. M. *Matrix commutators over an algebraically closed field*, 30.
Goffman, Casper and Pedrick, George. *A proof of the homeomorphism of Lebesgue-Stieltjes measure with Lebesgue measure*, 196.
Golan, Jonathan S. *Modules satisfying both chain conditions with respect to a torsion theory*, 103.
Goldman, Jay R., Joichi, J. T. and White, Dennis E. *Rook theory. I. Rook equivalence of Ferrers boards*, 485.
Goncalves, A. and Ho, C. Y. *Hall subgroups and p-solvability*, 97.
Grande, Zbigniew. *Une caractérization des ensembles des points de discontinuité des fonctions linéairement-continues*, 257.
Griess, Robert L., Jr. and Lyons, Richard. *The automorphism group of the Tits simple group* ${}^2F_4(2)'$, 75.
Hagopian, Charles L. *Disk-like products of* λ *connected continua. II*, 479.
Hallenbeck, D. J. and Ruscheweyh, Stephan, *Subordination by convex functions*, 191.
Handelman, David. *When is the maximal ring of quotients projective?*, 125.
Hansen, Friedhelm. *Certain overrings of right hereditary, right Noetherian rings are V-rings*, 85.
Harnik, Victor. *On the existence of saturated models of stable theories*, 361.
Harrington, Leo. Π^1_2 *sets and* Π^1_2 *singletons*, 356.
